Acting Chief, Electrical Equipment Branch, ORR

Transmittal of Information to [REDACTED]

25X1X7

1. The following is in answer to [REDACTED] query contained in 25X1X7
your memorandum [REDACTED] 22 November 1957:

A search of information provided by the source described failed to disclose further details in support of his statements concerning the disparity of costs between the Hungarian and USSR electron tube industries. One document based on information provided by this source might be of interest to [REDACTED] if it has not been made available to him earlier. This report was sent to [REDACTED] as an attachment to FI dispatch [REDACTED] 3 April 1957.

2. The following is also for [REDACTED]

25X1X7

25X1A6a When I was in [REDACTED] I discussed with [REDACTED] the economic 25X1X7
relationships within the U. S. electronics industry which Mr. [REDACTED]

25X1A9a [REDACTED] had used for analog purposes in his studies on the
Soviet industry. We had discussed the problem of estimating
production levels of total industry from details on levels of
production of component parts. Attachment I to this memorandum
contains some recently available details of U. S. industry
characteristics. We would welcome any comments [REDACTED] would
care to make relevant to the problem discussed on this material,
and we would be very pleased to receive any comparable data on
[REDACTED]

3. The following is for [REDACTED]

25X1A9a

25X1A9a Please inform [REDACTED] that I was able to obtain through
our library the majority of the reports and translations on
computers, automation and mechanization which he had made
available for me to see when I was in [REDACTED] There were a few
which I was not able to locate through our library, and I would
like to take advantage of his kind offer to provide me with
those. The ones I do not have are all translations and bear
the following numbers: T-102,138,140,142,193,194,253,273,278
280,281,286,298.
